What are SiteWatch™ motion detectors?

DW® SiteWatch™ motion detectors are NDAA/TAA compliant, and perfect for any installation that requires advanced motion detection. The detectors are fully integrated with DW Spectrum® IPVMS and can be controlled and managed remotely from the software.

Key Technologies

Motion detector and laser sensors for PTZ enhancement

Combine SiteWatch™ motion detectors with a PTZ camera. When motion is detected, the camera can be programmed to move to a specific preset, increasing efficiency and reducing false alarm cases.

Motion detector and laser sensors for daytime monitoring

SiteWatch™ motion detectors offer a programmable beam range of up to 1640ft (500m), offering truly exceptional resistance to false alarms.

Amplify panoramic surveillance

Combine detectors and illuminators with MEGApix® Pano™ multi-sensor and hemispheric fisheye cameras to create a formidable panoramic solution.

DW Spectrum® IPVMS

DW Spectrum® IPVMS is an endlessly customizable IP Video Management platform that gives users the ability to create tailored network video solutions for anytype of project, from the office or on in the field.

SiteWatch™ detectors and NightWatch™ illuminators

When the detectors detect motion, the illuminators can be programmed to turn on, and cameras can be activated to record. All devices can be controlled via DW Spectrum® IPVMS.

NDA / TAA Compliant

DW® IP cameras, analog cameras, NVRs, DVRs, network devices and management software sold and distributed worldwide are designed and developed in U.S.A. and Korea. Manufactured in Korea.

Most DW® products qualify for GSA Schedule Contracts and other government opportunities because they are TAA / NDA compliant.

Partner Support and Resources

DW is committed to the channel, continually expanding our network of system integrators, value added resellers (VARs) and installers.

Online Learning
