

For Immediate Release

## Digital Watchdog® and Sicunet Announce Partnership for DW Spectrum® IPVMS and Neptune for Access Control

### **DW Spectrum IPVMS v4.2**

**Cerritos, CA (May 24, 2021)** – [Digital Watchdog® \(DW\)](#), the industry leader in digital recorders, surveillance cameras and related management software, and [Sicunet](#), a cutting-edge access control manufacturer, announced the integration of DW Spectrum IPVMS video management platform with Hybrid on-premise and cloud managed Neptune Access Control management platforms.

The latest DW Spectrum integrates with Neptune's web browser and mobile app access control platform to reduce forensic search time and for a faster response. Videos can be tagged to events, popup when an event occurs, view live camera feed and all associate cameras from a server, and integrate up to 64 video feeds into Neptune at no additional cost.

---

“We welcome Sicunet and the Neptune access control system into the DW Spectrum ecosystem,” said Patrick Kelly, Director of IP Solutions, Digital Watchdog. “Their smart and simple platform aligns with DW Spectrum’s values without compromise.”

“We are excited to integrate with the premier video provider, DW Spectrum.” said John LaFond, SVP, Sicunet. “Integrating DW with our hybrid (on-premise and cloud) managed platform will provide both of our customers greater value and opportunities to close more business!”

DW Spectrum IPVMS is accessed with the freely distributed DW Spectrum client software (Windows®/Linux®/Mac®) and the free DW Spectrum mobile app for iOS and Android devices. DW Cloud™, a web client service powered by AWS, is included to enable simple remote connectivity, streaming and management of one or an unlimited number of DW Spectrum IPVMS systems from all leading web browsers (Google® Chrome, Firefox®, Internet Explorer®, Safari® and Opera®). The VMS software is included with pre-configured DW Blackjack® NVR servers, MEGApix® CaaS™ all-in-one camera systems or it can be installed on third-party Windows or Ubuntu® Linux-based systems.

The Neptune is an embedded browser-managed network appliance, designed to support the physical security requirements of facilities via a fast and intuitive HTML5 web interface on premise or via the cloud. Our hybrid access systems are designed to provide an operationally superior platform with exception low total cost of ownership. Feature that enhance the systems user experience such as mobile app management, integrated mobile credentials, and seamless DW Spectrum video integration. Its primary use is to inform, control, identify and quickly validate events. The system manages physical devices such as door locking hardware and other devices such as fans, pumps, or lighting control.

## **ABOUT DW**

DW<sup>®</sup> empowers our customers as the industry-leading single source of value-driven NDAA/TAA compliant complete solutions for all video surveillance applications (Universal HD over Coax<sup>®</sup> / hybrid / IP enterprise), focusing on ease of use and ROI. DW<sup>®</sup> products offer technologically-advanced features including multi-sensor HD cameras at real-time 30fps, Star-Light Plus<sup>™</sup> color in darkness technology, WDR, Smart DNR<sup>™</sup> and Smart IR<sup>™</sup>. Complete IP megapixel surveillance solutions include single- and multi-sensor MEGApix<sup>®</sup> cameras and edge recording systems, Blackjack<sup>®</sup> servers and NAS devices, DW Spectrum<sup>®</sup> IPVMS for server, mobile and on-camera control. Complete Universal HD over Coax<sup>®</sup> surveillance solutions include single- and multi-sensor Star-Light Plus<sup>™</sup> cameras, VMAX<sup>®</sup> DVRs and C3<sup>®</sup> remote management and event server software. DW<sup>®</sup> supports all video surveillance systems with SiteWatch<sup>™</sup> motion detectors and NightWatch<sup>™</sup> illuminators. DW's Elevated Skin Temperature System (E.S.T.<sup>™</sup>) automatically prescreens everyone entering a building.

## **ABOUT SICUNET**

Sicunet is a cutting-edge Access Control manufacturer that has created the hybrid solution to your access control problems. You can manage our platform via a browser on premise or the cloud. This hybrid architecture provides the greatest flexibility for system management without the compromises presented by other cloud-only based systems. We have 100k systems deployed under the Sicunet name, numerous OEM brands and seventy plus years of Access Control experience among us. Our team of engineers have created a feature rich, value leading platform that has mobile app management, integrated mobile credentials, and seamless video integration with no on-going monthly fees. You may not have heard of us, but you have definitely entered a building using our gear. Give us a call to learn more about us. Visit [www.sicunet.com](http://www.sicunet.com) for more information.
