

Compressor™ 4-Channel IP Signal Encoder

The CP-04 is an Analog to IP signal compressor, converting up to 4 analog cameras into IP signal at a maximum of 120fps at D1 resolution. The Compressor offers strong features such as Two-Way Audio, PTZ control, Micro SD Card for local backup, Intelligent motion detection, and Single Streaming with Dual Codec. The Compressor is a perfect solution for applications that have both analog and network surveillance solutions, and are looking to get the most out of both platforms.

- Audio Input/ Output: 1 Audio input, 1 Audio output
- Central Management Software: DW Spectrum IPVMS
- Codecs & Streams: H.264, MJPEG
- Digital Zoom: Live and Playback
- Firmware Upgrade: Auto via FTP Server and Manual
- Multiple Recording Schedules: yes
- OnVIF Conformant
- Panic Recording
- Remote Software Platforms: Windows, Linux, and MAC
- Sensor Input/ Output: 4 Sensor inputs 4 Alarm outputs
- Simple & Free DDNS: yes
- Special Search Options: Convert analog video to IP signal at D1 resolution, Rs-485 and RS-232 command ports, local micro SD card for backup, periodical notifications to FTP server with screen shots
- Watermark Verification [Digital Signature Authentication]
- Web- Based Client with Multi- User Access: Live, PTZ Control, Playback, Remote Configuration
- PTZ: Full analog PTZ camera control via RS-485 and RS-232 ports
- Back Up: Remote Backup using the DW Spectrum IPVMS
- Motion Detection

- Recording Mode: Scheduled, Motion, Event
- E-mail and Text Event Notifications: E-mail & FTP notifications with screen shot attached
- Works with DW Spectrum™ IPVMS recording License (needs qty 1 DW-SPCP04LSC004, Sold Separately)
- 2 years warranty
